6. 操作方式 OPERATION INTRODUCTION

跑道10米以上 Runway more than 10m
(1). **对频**：先将电池连接到机身，机身发出开机声效，飞机4颗信号灯闪烁，关上电池盖，再将飞机放在平整的跑道上。将遥控器电源开关推向"ON"位置，再将遥控器左操纵杆向上推到顶，再往下拉到底，飞机前后信号灯长亮，机翼信号灯闪烁，对频成功。

Frequency matching: First connect the battery to the fuselage, the fuselage emits a power on sound effect, the aircraft's four signal lights flash, close the battery cover, and then place the aircraft on a flat runway. Push the power switch of the remote control to the "ON" position, then push the left joystick of the remote control up to the top, and then pull it all the way down. The front and rear signal lights of the aircraft will remain on, and the wing signal lights will flash, indicating successful frequency alignment.

(2). **起飞**：将遥控器左操纵杆向上推（加大油门），螺旋桨旋转速度加快，飞机滑行一段距离后上升。

Takeoff: Push the left joystick of the remote control upward (increase the accelerator), the propeller rotates faster, and the aircraft glides for a distance before rising.

跑道10米以上 Runway more than 10m

(3). **降落**：将遥控器左操纵杆向下拉（降低油门），螺旋桨旋转速度减弱，飞机自然飘落。

Landing: pull down the left joystick of the remote control (lower the throttle), the propeller rotation speed will be reduced, and the aircraft will fall naturally.
(4). **上升**：将遥控器右操纵杆向下拉，水平尾翼舵面向下，飞机随之上升。

Ascending: pull down the right joystick of the remote control, and the horizontal tail control surface is downward, then the aircraft will ascend.

(5). 下降：将遥控器右操纵杆向上推，水平尾翼舵面向上，飞机随之下降。
Descending: Push the right joystick of the remote control upward, and the horizontal tail rudder faces upward, so that the aircraft descends.

(6). 左转弯：将遥控器左操纵杆向左移动时，飞机随之向左转弯。
Left turn: When the left joystick of the remote control is moved to the left, the aircraft will turn left accordingly.
(7). 右转弯：将遥控器左操纵杆右移动时，飞机随之向右转弯。
Right turn: When the left joystick of the remote control is moved to the right, the aircraft will turn right accordingly.

(8). 左倾斜：将遥控器右操纵杆向左移动时，飞机随之向左倾斜。
Left tilt: When the right joystick of the remote control is moved to the left, the aircraft will tilt to the left accordingly.
(9). **右倾斜：** 将遥控器右操纵杆向右移动时，飞机随之向右倾斜。
Right tilt: When the right joystick of the remote control is moved to the right, the aircraft will tilt to the right.
(10). **一键翻滚(新手模式专用)：** 将遥控器切换到新手模式，点按"一键翻滚"按键，向上或向下推右控制杆，飞机向后翻滚。再点按"一键翻滚"按键，向左/右推右控制杆，飞机向左/右翻滚。(翻滚完毕后，需再次点按一键翻滚按键，才能再次翻滚)
One click roll (Dedicated to novice mode): Switch the remote control to novice mode, press the "One click roll" button, push the right control lever up or down, and the aircraft rolls backwards. Press the "One Key Roll" button again, push the right control lever left/right, and the aircraft will roll left/right. (After rolling, you need to press the rolling button again to roll again.)
